NexaNova Technologies

Company Profile | Fictional Demo Organization | Version 1.0

1. About the Company

NexaNova Technologies is a fictional software company headquartered in Bengaluru, India. Founded in 2021, the company builds workflow automation, analytics, and customer-support tools for small and medium-sized businesses.

2. Mission and Vision

Mission: make everyday business operations simpler through dependable, easy-to-use software. Vision: help growing teams make better decisions with accessible technology.

3. Products and Services

• NovaDesk — a customer support workspace for managing conversations and service requests.

• NovaFlow — a no-code workflow automation tool for approvals and repetitive tasks.

• NovaInsights — dashboards and reports for operational performance.

• Implementation services — onboarding, configuration, and team training.

4. Customer Segments

Typical customers include retail businesses, professional services firms, online merchants, and growing technology teams. NexaNova serves fictional demo customers such as Maple & Main Retail, BrightPath Consulting, and OrbitCart.

5. Support and Business Hours

Standard support hours are Monday to Friday, 9:00 AM–6:00 PM India Standard Time (IST), excluding published company holidays. Priority support is available to eligible enterprise customers under their service agreement.
